# On the Two Short Axiomatizations of Ortholattices 

Wioletta Truszkowska<br>University of Białystok

Adam Grabowski ${ }^{1}$<br>University of Białystok

#### Abstract

Summary. In the paper, two short axiom systems for Boolean algebras are introduced. In the first section we show that the single axiom $\left(\mathrm{DN}_{1}\right)$ proposed in [2] in terms of disjunction and negation characterizes Boolean algebras. To prove that $\left(\mathrm{DN}_{1}\right)$ is a single axiom for Robbins algebras (that is, Boolean algebras as well), we use the Otter theorem prover. The second section contains proof that the two classical axioms (Meredith ${ }_{1}$ ), (Meredith ${ }_{2}$ ) proposed by Meredith [3] may also serve as a basis for Boolean algebras. The results will be used to characterize ortholattices.

MML Identifier: ROBBINS2.

The terminology and notation used in this paper have been introduced in the following articles: [4], [5], and [1].

## 1. Single Axiom for Boolean Algebras

Let $L$ be a non empty complemented lattice structure. We say that $L$ satisfies $\left(\mathrm{DN}_{1}\right)$ if and only if:
(Def. 1) For all elements $x, y, z, u$ of the carrier of $L$ holds $\left(\left((x+y)^{\mathrm{c}}+z\right)^{\mathrm{c}}+(x+\right.$ $\left.\left.\left(z^{\mathrm{c}}+(z+u)^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}=z$.
Let us observe that TrivComplLat satisfies $\left(\mathrm{DN}_{1}\right)$ and TrivOrtLat satisfies ( $\mathrm{DN}_{1}$ ).

Let us observe that there exists a non empty complemented lattice structure which is join-commutative and join-associative and satisfies $\left(\mathrm{DN}_{1}\right)$.

Next we state a number of propositions:

[^0](1) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z, u, v$ be elements of the carrier of $L$. Then $\left((x+y)^{\text {c }}+(((z+\right.$ $\left.\left.\left.u)^{\mathrm{c}}+x\right)^{\mathrm{c}}+\left(y^{\mathrm{c}}+(y+v)^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}=y$.
(2) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z, u$ be elements of the carrier of $L$. Then $\left((x+y)^{\mathrm{c}}+\left((z+x)^{\mathrm{c}}+\right.\right.$ $\left.\left.\left(y^{\mathrm{c}}+(y+u)^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}=y$.
(3) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x$ be an element of the carrier of $L$. Then $\left(\left(x+x^{\mathrm{c}}\right)^{\mathrm{c}}+x\right)^{\mathrm{c}}=x^{\mathrm{c}}$.
(4) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z, u$ be elements of the carrier of $L$. Then $\left((x+y)^{\mathrm{c}}+\left((z+x)^{\mathrm{c}}+\right.\right.$ $\left.\left.\left(\left(\left(y+y^{\mathrm{c}}\right)^{\mathrm{c}}+y\right)^{\mathrm{c}}+(y+u)^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}=y$.
(5) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z$ be elements of the carrier of $L$. Then $\left((x+y)^{\mathrm{c}}+\left((z+x)^{\mathrm{c}}+y\right)^{\mathrm{c}}\right)^{\mathrm{c}}=$ $y$.
(6) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y$ be elements of the carrier of $L$. Then $\left((x+y)^{\mathrm{c}}+\left(x^{\mathrm{c}}+y\right)^{\mathrm{c}}\right)^{\mathrm{c}}=y$.
(7) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y$ be elements of the carrier of $L$. Then $\left(\left((x+y)^{\mathrm{c}}+x\right)^{\mathrm{c}}+(x+y)^{\mathrm{c}}\right)^{\mathrm{c}}=$ $x$.
(8) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y$ be elements of the carrier of $L$. Then $\left(x+\left((x+y)^{\mathrm{c}}+x\right)^{\mathrm{c}}\right)^{\mathrm{c}}=$ $(x+y)^{\mathrm{c}}$.
(9) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z$ be elements of the carrier of $L$. Then $\left(\left((x+y)^{\mathrm{c}}+z\right)^{\mathrm{c}}+(x+z)^{\mathrm{c}}\right)^{\mathrm{c}}=$ $z$.
(10) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $\left(x+\left((y+z)^{\mathrm{c}}+(y+x)^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}=$ $(y+x)^{\mathrm{c}}$.
(11) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $\left(\left(\left((x+y)^{\mathrm{c}}+z\right)^{\mathrm{c}}+\left(x^{\mathrm{c}}+\right.\right.\right.$ $\left.\left.y)^{\mathrm{c}}\right)^{\mathrm{c}}+y\right)^{\mathrm{c}}=\left(x^{\mathrm{c}}+y\right)^{\mathrm{c}}$.
(12) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $\left(x+\left((y+z)^{\mathrm{c}}+(z+x)^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}=$ $(z+x)^{\mathrm{c}}$.
(13) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z, u$ be elements of the carrier of $L$. Then $\left((x+y)^{\mathrm{c}}+\left((z+x)^{\mathrm{c}}+\right.\right.$ $\left.\left.\left(y^{\mathrm{c}}+(u+y)^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}=y$.
(14) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y$ be elements of the carrier of $L$. Then $(x+y)^{\mathrm{c}}=(y+x)^{\mathrm{c}}$.
(15) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ )
and $x, y, z$ be elements of the carrier of $L$. Then $\left(\left((x+y)^{\mathrm{c}}+(y+z)^{\mathrm{c}}\right)^{\mathrm{c}}+z\right)^{\mathrm{c}}=$ $(y+z)^{\mathrm{c}}$.
(16) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z$ be elements of the carrier of $L$. Then $\left(\left(x+\left((x+y)^{\mathrm{c}}+z\right)^{\mathrm{c}}\right)^{\mathrm{c}}+z\right)^{\mathrm{c}}=$ $\left((x+y)^{\mathrm{c}}+z\right)^{\mathrm{c}}$.
(17) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y$ be elements of the carrier of $L$. Then $\left(\left((x+y)^{\mathrm{c}}+x\right)^{\mathrm{c}}+y\right)^{\mathrm{c}}=(y+y)^{\mathrm{c}}$.
(18) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y$ be elements of the carrier of $L$. Then $\left(x^{\mathrm{c}}+(y+x)^{\mathrm{c}}\right)^{\mathrm{c}}=x$.
(19) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y$ be elements of the carrier of $L$. Then $\left((x+y)^{\mathrm{c}}+y^{\mathrm{c}}\right)^{\mathrm{c}}=y$.
(20) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y$ be elements of the carrier of $L$. Then $\left(x+\left(y+x^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}=x^{\mathrm{c}}$.
(21) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x$ be an element of the carrier of $L$. Then $(x+x)^{\mathrm{c}}=x^{\mathrm{c}}$.
(22) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y$ be elements of the carrier of $L$. Then $\left(\left((x+y)^{\mathrm{c}}+x\right)^{\mathrm{c}}+y\right)^{\mathrm{c}}=y^{\mathrm{c}}$.
(23) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x$ be an element of the carrier of $L$. Then $\left(x^{\mathrm{c}}\right)^{\mathrm{c}}=x$.
(24) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y$ be elements of the carrier of $L$. Then $\left((x+y)^{\mathrm{c}}+x\right)^{\mathrm{c}}+y=\left(y^{\mathrm{c}}\right)^{\mathrm{c}}$.
(25) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y$ be elements of the carrier of $L$. Then $\left((x+y)^{\mathrm{c}}\right)^{\mathrm{c}}=y+x$.
(26) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $x+\left((y+z)^{\mathrm{c}}+(y+x)^{\mathrm{c}}\right)^{\mathrm{c}}=$ $\left((y+x)^{\mathrm{c}}\right)^{\mathrm{c}}$.
(27) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y$ be elements of the carrier of $L$. Then $x+y=y+x$.
One can verify that every non empty complemented lattice structure which satisfies $\left(\mathrm{DN}_{1}\right)$ is also join-commutative.

Next we state a number of propositions:
(28) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y$ be elements of the carrier of $L$. Then $\left((x+y)^{\mathrm{c}}+x\right)^{\mathrm{c}}+y=y$.
(29) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y$ be elements of the carrier of $L$. Then $\left((x+y)^{\mathrm{c}}+y\right)^{\mathrm{c}}+x=x$.
(30) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y$ be elements of the carrier of $L$. Then $x+\left((y+x)^{\mathrm{c}}+y\right)^{\mathrm{c}}=x$.
(31) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y$ be elements of the carrier of $L$. Then $\left(x+y^{\mathrm{c}}\right)^{\mathrm{c}}+\left(y^{\mathrm{c}}+y\right)^{\mathrm{c}}=\left(x+y^{\mathrm{c}}\right)^{\mathrm{c}}$.
(32) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y$ be elements of the carrier of $L$. Then $(x+y)^{\mathrm{c}}+\left(y+y^{\mathrm{c}}\right)^{\mathrm{c}}=(x+y)^{\mathrm{c}}$.
(33) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y$ be elements of the carrier of $L$. Then $(x+y)^{\mathrm{c}}+\left(y^{\mathrm{c}}+y\right)^{\mathrm{c}}=(x+y)^{\mathrm{c}}$.
(34) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y$ be elements of the carrier of $L$. Then $\left(\left(\left(x+y^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}+y\right)^{\mathrm{c}}=\left(y^{\mathrm{c}}+y\right)^{\mathrm{c}}$.
(35) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y$ be elements of the carrier of $L$. Then $\left(x+y^{\mathrm{c}}+y\right)^{\mathrm{c}}=\left(y^{\mathrm{c}}+y\right)^{\mathrm{c}}$.
(36) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z$ be elements of the carrier of $L$. Then $\left(\left(\left(x+y^{\mathrm{c}}+z\right)^{\mathrm{c}}+y\right)^{\mathrm{c}}+\right.$ $\left.\left(y^{\mathrm{c}}+y\right)^{\mathrm{c}}\right)^{\mathrm{c}}=y$.
(37) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $x+\left((y+z)^{\mathrm{c}}+(y+x)^{\mathrm{c}}\right)^{\mathrm{c}}=$ $y+x$.
(38) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $x+\left(y+\left((z+y)^{\mathrm{c}}+x\right)^{\mathrm{c}}\right)^{\mathrm{c}}=$ $(z+y)^{\mathrm{c}}+x$.
(39) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $x+\left((y+x)^{\mathrm{c}}+(y+z)^{\mathrm{c}}\right)^{\mathrm{c}}=$ $y+x$.
(40) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $\left((x+y)^{\mathrm{c}}+\left((x+y)^{\mathrm{c}}+\right.\right.$ $\left.\left.(x+z)^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}+y=y$.
(41) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z$ be elements of the carrier of $L$. Then $\left(\left(\left(x+y^{\mathrm{c}}+z\right)^{\mathrm{c}}+y\right)^{\mathrm{c}}\right)^{\mathrm{c}}=y$.
(42) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z$ be elements of the carrier of $L$. Then $x+\left(y+x^{\mathrm{c}}+z\right)^{\mathrm{c}}=x$.
(43) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $x^{\mathrm{c}}+(y+x+z)^{\mathrm{c}}=x^{\mathrm{c}}$.
(44) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y$ be elements of the carrier of $L$. Then $(x+y)^{\mathrm{c}}+x=x+y^{\mathrm{c}}$.
(45) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y$ be elements of the carrier of $L$. Then $\left(x+\left(x+y^{\mathrm{c}}\right)^{\mathrm{c}}\right)^{\mathrm{c}}=(x+y)^{\mathrm{c}}$.
(46) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $\left((x+y)^{\mathrm{c}}+(x+z)\right)^{\mathrm{c}}+y=y$.
(47) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $\left(\left((x+y)^{\mathrm{c}}+z\right)^{\mathrm{c}}+\left(x^{\mathrm{c}}+\right.\right.$ $\left.y)^{\mathrm{c}}\right)^{\mathrm{c}}+y=\left(\left(x^{\mathrm{c}}+y\right)^{\mathrm{c}}\right)^{\mathrm{c}}$.
(48) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$
and $x, y, z$ be elements of the carrier of $L$. Then $\left(\left((x+y)^{\mathrm{c}}+z\right)^{\mathrm{c}}+\left(x^{\mathrm{c}}+\right.\right.$ $\left.y)^{\mathrm{c}}\right)^{\mathrm{c}}+y=x^{\mathrm{c}}+y$.
(49) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $\left(x^{\mathrm{c}}+\left(\left((y+x)^{\mathrm{c}}\right)^{\mathrm{c}}+(y+\right.\right.$ $\left.z))^{\mathrm{c}}\right)^{\mathrm{c}}+(y+z)=\left((y+x)^{\mathrm{c}}\right)^{\mathrm{c}}+(y+z)$.
(50) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z$ be elements of the carrier of $L$. Then $\left(x^{\mathrm{c}}+(y+x+(y+z))^{\mathrm{c}}\right)^{\mathrm{c}}+$ $(y+z)=\left((y+x)^{\mathrm{c}}\right)^{\mathrm{c}}+(y+z)$.
(51) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z$ be elements of the carrier of $L$. Then $\left(x^{\mathrm{c}}+(y+x+(y+z))^{\mathrm{c}}\right)^{\mathrm{c}}+$ $(y+z)=(y+x)+(y+z)$.
(52) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z$ be elements of the carrier of $L$. Then $\left(x^{\mathrm{c}}\right)^{\mathrm{c}}+(y+z)=(y+$ $x)+(y+z)$.
(53) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z$ be elements of the carrier of $L$. Then $(x+y)+(x+z)=y+(x+z)$.
(54) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $(x+y)+(x+z)=z+(x+y)$.
(55) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $x+(y+z)=z+(y+x)$.
(56) Let $L$ be a non empty complemented lattice structure satisfying $\left(\mathrm{DN}_{1}\right)$ and $x, y, z$ be elements of the carrier of $L$. Then $x+(y+z)=y+(z+x)$.
(57) Let $L$ be a non empty complemented lattice structure satisfying ( $\mathrm{DN}_{1}$ ) and $x, y, z$ be elements of the carrier of $L$. Then $(x+y)+z=x+(y+z)$.
Let us observe that every non empty complemented lattice structure which satisfies $\left(\mathrm{DN}_{1}\right)$ is also join-associative and every non empty complemented lattice structure which satisfies $\left(\mathrm{DN}_{1}\right)$ is also Robbins.

One can prove the following propositions:
(58) Let $L$ be a non empty complemented lattice structure and $x, z$ be elements of the carrier of $L$. Suppose $L$ is join-commutative, join-associative, and Huntington. Then $(z+x) *\left(z+x^{\mathrm{c}}\right)=z$.
(59) Let $L$ be a non empty complemented lattice structure such that $L$ is join-commutative, join-associative, and Robbins. Then $L$ satisfies $\left(\mathrm{DN}_{1}\right)$.
Let us mention that every non empty complemented lattice structure which is join-commutative, join-associative, and Robbins satisfies also $\left(\mathrm{DN}_{1}\right)$.

Let us observe that there exists a pre-ortholattice which is de Morgan and satisfies $\left(\mathrm{DN}_{1}\right)$.

One can verify that every pre-ortholattice which is de Morgan satisfies ( $\mathrm{DN}_{1}$ ) is also Boolean and every well-complemented pre-ortholattice which is Boolean satisfies also $\left(\mathrm{DN}_{1}\right)$.

## 2. Meredith Two Axioms for Boolean Algebras

Let $L$ be a non empty complemented lattice structure. We say that $L$ satisfies (Meredith ${ }_{1}$ ) if and only if:
(Def. 2) For all elements $x, y$ of the carrier of $L$ holds $\left(x^{\mathrm{c}}+y\right)^{\mathrm{c}}+x=x$.
We say that $L$ satisfies $\left(\right.$ Meredith $\left._{2}\right)$ if and only if:
(Def. 3) For all elements $x, y, z$ of the carrier of $L$ holds $\left(x^{\mathrm{c}}+y\right)^{\mathrm{c}}+(z+y)=$ $y+(z+x)$.
Let us note that every non empty complemented lattice structure which satisfies $\left(\right.$ Meredith $\left._{1}\right)$ and (Meredith $h_{2}$ ) is also join-commutative, join-associative, and Huntington and every non empty complemented lattice structure which is join-commutative, join-associative, and Huntington satisfies also (Meredith ${ }_{1}$ ) and (Meredith ${ }_{2}$ ).

Let us note that there exists a pre-ortholattice which is de Morgan and satisfies $\left(\right.$ Meredith $\left._{1}\right)$, $\left(\right.$ Meredith $\left._{2}\right)$, and $\left(\mathrm{DN}_{1}\right)$.

Let us observe that every pre-ortholattice which is de Morgan satisfies (Meredith ${ }_{1}$ ) and (Meredith ${ }_{2}$ ) is also Boolean and every well-complemented preortholattice which is Boolean satisfies also (Meredith ${ }_{1}$ ) and (Meredith 2 ).
